

إدارة الفاقد الغذائي: تقنيات فعالة للحد من هدر الطعام في العالم العربي

Duration: 5 Days

Language: ar

Course Code: IND10-106

Objective

:Upon completion of this course, participants will be able to

- Understand the importance of effective food waste management within an organisation.
- Investigate laws and regulations surrounding food waste to ensure full compliance.
 - Ensure all food waste practices are in alignment with environmental protection standards.
 - Identify the stages and aspects of the food disposal process.
- Explore various strategies for reducing food waste through community engagement and sustainable practices.
 - Assess the challenges faced within food waste management and how to navigate these.
- Conduct food waste audits to understand the different aspects of food waste, including the primary food being wasted and amounts.

Audience

This course is designed for anyone within an organisation responsible for waste

management. It would be most beneficial for:

- Sustainability Officers
- HSE Officers
- Operations Managers
- Waste Managers
- Food Recycling Directors
- Food Waste and Composting Managers
- Senior Food Loss Consultants

Training Methodology

This course uses a variety of adult learning styles to aid full understanding and comprehension. Participants will review real-world examples of organisations that process food waste to highlight key methods and potential areas for reducing food loss.

To ensure the participants gain a thorough understanding of the taught content, they will participate in a variety of learning exercises, including presentations, group discussions, video materials, and practical activities. This combination of methods allows the participants to comprehend the knowledge and fully practise any relevant practical skills.

Summary

An organisation is bound to be responsible for managing food waste to some degree when involved in any process in the food industry. Food waste management is a crucial process that allows food to be disposed of safely and healthily and is fully compliant with government regulations.

To ensure all waste is processed accordingly, organisations need to understand how to categorise foods, especially those that can pose a danger to health if not processed correctly, like meat and dairy. The disposal of these products must follow specific guidelines to ensure all safe products can be used and all waste is removed reasonably.

A large part of food waste management is reducing waste. Many methods can be used for this, including food-waste audits. Organisations can also turn to the community to help reduce waste by offering reduced costs on lower-appeal items, donating food surplus, and encouraging customers to buy undesirable products.

Course Content & Outline

Section 1: Fundamentals of Food Waste Management

- Defining what food waste management is, its necessity and importance within an organisation.
- Exploring the internal and external influences of food waste and how to mitigate negative influences.
- Identifying the different aspects of the food disposal process and their purpose and standards.
- Typical systems to aid in the process of food disposal and overall waste management.

Section 2: Meat and Dairy Processing

- Reviewing legislation and guidelines detailing the process of disposing of meat and dairy.
- What meats must be removed from the food supply chain and the ideal way to dispose of these.
 - Ensuring all meat and dairy products are correctly labelled.
- Following meat categorises to ensure all products are processed and used accordingly and understanding why some parts are not deemed as waste.

Section 3: Retail Operations

- Understanding guidelines for disposing food waste within a retail setting.
- Utilising various methods to measure food waste and reporting the numbers accordingly effectively.
- Documenting food waste and food surplus separately, the period of time and the amount.
- Defining food inventory and the percentage of sold food in comparison to waste.
- Creating a food waste reduction roadmap to evaluate areas of significant waste and how to reduce them.

Section 4: Waste Collection

- Separating food waste and arranging for the correct disposal method.
- Identifying the ideal methods of disposing of different types of foods.
- Conducting food-waste audits to gather in-depth and accurate data on food waste.
 - Comparing the advantages and disadvantages of food waste audits and potential alternative methods.
- Adhering to the administration requirements of waste collection.

Section 5: Sustainable Waste Management

- Reducing waste through sustainable practices.
- Engaging with communities and encouraging individuals to buy from local farmers selling undesirable produce.
 - Donating food surplus to charities or local communities.
- Going the extra mile to find more appropriate methods of storing food to preserve items for longer.

Certificate Description

Holistique Training عند إتمام هذه الدورة التدريبية بنجاح، سيحصل المشاركون على شهادة إتمام التدريب من (e-Certificate) وبالنسبة للذين يحضرون ويكملون الدورة التدريبية عبر الإنترنت، سيتم تزويدهم بشهادة إلكترونية من Holistique Training.

وخدمة اعتماد التطوير المهني (BAC) معتمدة من المجلس البريطاني للتقييم Holistique Training شهادات ISO 29993 أو ISO 21001 أو ISO 9001 كما أنها معتمدة وفق معايير (CPD) المستمر

لهذه الدورة من خلال شهادتنا، وستظهر هذه النقاط على شهادة إتمام (CPD) يتم منح نقاط التطوير المهني المستمر واحدة عن كل ساعة CPD يتم منح نقطة CPD، ووفقاً لمعايير خدمة اعتماد Holistique Training التدريب من لأي دورة واحدة نقدمها حالياً CPD حضور في الدورة. ويمكن المطالبة بحد أقصى قدره 50 نقطة
