

فهم أنظمة التأمين الصحي والسياسات في العالم العربي: دليل شامل

Duration: 5 Days

Language: ar

Course Code: PO5-124

Objective

:By the end of this course, participants will be able to

- .Understand the key principles and models of health insurance systems •
- .Analyse the financing and regulatory mechanisms of health insurance •
- .Evaluate the role of policy in ensuring equity, access, and quality in healthcare •
- .Compare international health insurance systems and their outcomes •
- .Assess the impact of health insurance reforms on populations and healthcare providers •

Audience

:This course is ideal for

- .Health insurance professionals and policymakers •
- .Healthcare administrators and managers •
- .Public health and policy specialists •
- .Regulators and compliance officers •
- .Professionals working in NGOs, donor agencies, or international health organisations •

Training Methodology

The course combines interactive lectures, case study analysis, group discussions, and policy evaluation exercises. Participants will engage with practical examples and international comparisons to apply concepts to their professional context.

Summary

This specialised training course provides an in-depth understanding of health insurance systems and the policies that govern them. Participants will explore the structures, financing models, and regulatory frameworks that shape health insurance globally. The course highlights the balance between accessibility, affordability, and quality of care, while examining the role of governments, private insurers, and international organisations in shaping health policy.

Through real-world examples and case studies, participants will learn how different health insurance systems operate, compare policy approaches across countries, and analyse the impact of reforms on healthcare delivery and equity.

Course Content & Outline
