

بناء الصمود لدى الطلاب والفرق في العالم العربي

Duration: 5 Days

Language: ar

Course Code: IND08-115

Objective

:By the end of this course, participants will be able to

- .Understand the science and key components of resilience •
- .Recognize factors that strengthen or undermine resilience in individuals and groups •
- .Develop strategies to help students and teams manage stress and setbacks constructively •
- .Create emotionally safe environments that encourage growth and persistence •
- .Teach and model resilience-building practices in daily interactions •
- .Foster a culture of optimism, collaboration, and adaptability •

Audience

:This course is ideal for

- .Teachers and lecturers at all levels •
- .School principals, coordinators, and team leaders •
- .Corporate and educational trainers •
- .Youth workers and coaches •
- .HR professionals and managers overseeing teams •
- Anyone committed to strengthening the emotional and mental resilience of their learners •
- .or team members

Training Methodology

The course combines engaging presentations, reflective exercises, group discussions, case studies, and practical activities. Participants will develop actionable plans to strengthen resilience in their students or teams, tailored to their unique context.

Summary

Resilience — the ability to adapt, recover, and grow stronger in the face of challenges — is a crucial skill for both learners and teams in today's unpredictable world. Whether in the classroom, on a project team, or within a school community, fostering resilience leads to improved wellbeing, higher engagement, and better long-term outcomes.

This course equips educators, trainers, and leaders with practical tools and strategies to build resilience in students and teams. You'll learn how to create supportive environments, teach coping skills, and model resilience yourself — inspiring those you lead to thrive even in tough times.

Course Content & Outline

Section 1: Understanding Resilience

- What is resilience and why does it matter in education and leadership
- The psychology and neuroscience of resilience
- Myths about resilience and how to overcome them
- Signs of low vs. high resilience in students and teams
