

Performance Management Theories

Duration: 5 Days

Language: en

Course Code: MG2 - 219

Objective

:By the end of this training course, participants will be able to

- .Understand the core theories underpinning modern performance management •
- .Distinguish between traditional and contemporary approaches •
- .Analyse the psychological, structural, and strategic components of performance systems •
- .Design effective performance management frameworks tailored to organisational needs •
- .Apply key theories to enhance motivation, engagement, and accountability •
- .Identify and address biases, limitations, and challenges in current performance models •

Audience

:This course is ideal for

- .HR and Performance Management Professionals •
- .Organisational Development and Learning Leaders •
- .Team Leaders and Department Managers •
- .Talent Management and Employee Experience Officers •
- .Researchers, Consultants, and Academics in HRM or Business Strategy •

Training Methodology

The course uses a blend of case-based learning, expert-led discussion, theory-to-practice translation, group activities, and scenario analysis. Real-world examples are used to illustrate the practical application of theoretical frameworks. Participants will also evaluate their own organisational performance systems through guided reflection and analysis

Summary

This advanced training course offers a deep dive into the foundational and modern theories of performance management and their practical application in contemporary organisations. By exploring both classical and emerging frameworks, participants will gain a holistic understanding of how performance is defined, measured, influenced, and improved at individual, team, and organisational levels

The course equips participants with the analytical and strategic tools to align performance management systems with business goals, employee development, and long-term growth. It also integrates behavioural science, motivation theories, and systems thinking to create a comprehensive view of performance as a dynamic, multi-dimensional process
