- .Insurance executives and managers •
- .Sustainability and ESG officers •
- .Risk managers and underwriters •
- .Investment and asset management professionals •
- .Regulators, policymakers, and compliance officers •
- .Consultants and advisors in sustainable finance •

Training Methodology

The course combines expert-led lectures, case study analysis, and interactive discussions. Participants will evaluate ESG practices in leading insurance firms and design strategies for integrating sustainability into their own organisations

Summary

This advanced training course examines the growing importance of sustainability and Environmental, Social, and Governance (ESG) integration in the insurance industry. As global markets shift towards responsible investment and climate resilience, insurers are under increasing pressure to align their business models with ESG principles

Participants will explore how insurers can embed ESG into underwriting, investment decisions, risk management, and corporate strategy. The course highlights regulatory frameworks, disclosure standards, and innovative practices that support sustainable insurance. Real-world case studies demonstrate how ESG-driven approaches improve resilience, reputation, and long-term profitability
