

# Payment Systems and Logistics in Online Retail

**Duration:** 5 Days

**Language:** en

**Course Code:** IND09-117

## Objective

:By the end of this course, participants will be able to

- .Understand the ecosystem of digital payment systems in online retail •
- .Evaluate the role of security, compliance, and fraud prevention in transactions •
- .Explore logistics strategies for order fulfilment, last-mile delivery, and returns •
- .Integrate payment and logistics systems for seamless customer experiences •
- .Analyse case studies of successful e-commerce operations and best practices •

## Audience

:This course is ideal for

- .E-commerce managers and entrepreneurs •
- .Digital payment and fintech professionals •
- .Logistics and supply chain managers •
- .Customer experience and operations managers •
- .Web developers and IT specialists in online retail •

## Training Methodology

The course combines interactive lectures, global case studies, and group discussions. Participants will review real-world scenarios, evaluate tools and platforms, and develop integrated strategies for payment and logistics excellence.

## Summary

This specialised training course provides a comprehensive understanding of the two critical pillars of online retail success: payment systems and logistics. Participants will explore how secure, seamless, and user-friendly payment methods, combined with efficient logistics and fulfilment strategies, directly impact customer satisfaction, trust, and profitability in e-commerce.

The course examines payment gateways, fraud prevention, digital wallets, and cross-border transactions, alongside inventory management, last-mile delivery, and reverse logistics. By the end of the course, learners will be able to design integrated systems that enhance operational efficiency and customer loyalty.
