

Procurement and Supply Chain Management in the Healthcare Sector

Duration: 5 Days

Language: en

Course Code: P01-119

Objective

:Upon completion of this course, participants will be able to

- Understand the procurement cycle and how to build productive relationships with suppliers.
- Develop proficient negotiation skills through mastering the negotiation cycle, creating practical sales-level agreements, and minimising related costs.
 - Cultivate the expertise to manage your inventory effectively.
- Examine how to evaluate performance at multiple levels in your supply chain through meaningfully designed KPIs.
 - Leverage the process of continuous improvement to maximise your operational efficiencies, generate higher productivity levels, and increase profit margins.

Audience

:This course is intended for

- Supply Chain Managers.
- Contract Managers.

- Procurement, Material, and Warehouse Managers.

Training Methodology

This course uses a variety of adult learning styles to aid full understanding and comprehension. Participants will review case studies to highlight key areas of importance and possible areas for faults. They will be supplied with the best tools required for learning exercises to improve their skills. Participants will analyse the examples to thoroughly understand how these skills, techniques and methods apply in the workplace.

Summary

Effective procurement management in the medical supply chain is essential to meeting patient needs, securing sufficient supplies, and reducing costs. External risks and demand variability can result in various related and hidden costs.

This course focuses on supply chain management specific to the requirements and challenges of the healthcare sector. In addition to analysing the procurement process and strategies to support effective procurement, you will master the necessary knowledge and tools to improve your organisation's performance and profitability.
