

Financing Oil, Gas, and Mining Projects

Duration: 5 Days

Language: en

Course Code: IND01-118

Objective

Upon completion of this course, participants will be able to:

- Summarise the unique attributes of oil, gas, and mining projects.
- Examine the financial implications of these projects and determine appropriate financing strategies.
- Evaluate the financial viability and sustainability of oil, gas, and mining projects.
 - Identify potential risks and assess price management strategies.
 - Analyse the financial performance and future of projects.

Audience

:This course is intended for

- Executives and Finance professionals in the Natural Resources sector
 - Professionals in the Banking and Finance industry
 - Investors in Natural Resource projects

Training Methodology

This course uses a variety of adult learning styles to aid full understanding and comprehension. Participants will review case studies to highlight key areas of importance and possible areas for faults. They will be supplied with the best tools required for learning exercises to improve their skills. Participants will analyse the examples to thoroughly understand how these skills, techniques and methods apply in the workplace.

Summary

Projects in the oil, gas, and mining sectors require significant capital investment and extended lead times and can incur considerable risks. Understanding the specific nature and implications of financing oil, gas, and mining projects can help provide a robust and transparent structure to increase investment and enhance economic growth.

This course provides you with the skills to analyse financial decisions, identify relevant sources of finance, and manage financial risks in natural resource projects. You will learn best practices for investment appraisals, how to manage resource prices and strategies to evaluate projects to optimise alignment with corporate and external regulatory objectives.
