

Cards & Payment Methods With Strategic Decision-Making

Duration: 5 Days

Language: en

Course Code: IND12-103

Objective

Upon completion of this course, participants will be able to:

- Understand the most effective process management systems and services to manage payments through your business.
 - Develop key concepts around receiving and issuing payments.
- Launch profitable credit and debit card schemes for making and receiving payments.
 - Understand the various payment platforms now in use in the banking industry.
 - Develop a roadmap for change to develop alongside competitors.
- Manage the key features of the card life cycle and what that means for your business.
 - Create a risk assessment process for card payments and devices.
 - Audit your card payment methods and enact responsible changes to respond to challenges or movements in the economic market.
 - Analyse your product and IT strategies and maintain best practices.
- Assess the regulations around making and receiving payments and understand your obligations as a reputable business.

Audience

This course is designed for anyone responsible for the data surrounding payments or is required to manage projects around current payment systems. It would be most beneficial for:

- Business Owners
- Financial Managers
- Chief Financial Officers
 - IT Consultants
 - Project Managers
 - Software Developers
 - Accountants
 - Data Analysts
 - Administrators
- Customer Service Teams

Training Methodology

This course uses various adult learning methods to aid full understanding and comprehension. Participants will review various patterns in payment processing and see videos and presentations to understand how technological changes affect payment processing.

In teams, the participants can identify potential fraud issues and place prevention and mitigation measures. They will also review their current payment processes and work to understand essential pain points and updates to stay ahead of the game. Group exercises will help participants understand their key marketing strategies within card processing and utilise the most up-to-date technologies to obtain the most successful outcomes.

Summary

The banking profession is evolving to meet consumer demands, with a shift from high street to online shopping necessitating fast and responsive payment methods. Businesses must continually review and update their payment processes, embracing new technology to ensure seamless online and face-to-face transactions. Popular apps like PayPal, Google Pay,

and Apple Pay enhance consumer convenience, driving sales and profits. Involving financial professionals and IT developers is crucial to optimising payment processes and ensuring efficiency and compatibility with various payment methods and regulations.

Course Content & Outline
