

Transaction & Loan Structuring And Sensible Budgeting

Duration: 5 Days

Language: en

Course Code: IND12-107

Objective

Upon completion of this course, participants will be able to:

- Identify the key risk areas when embarking on a loan.
- Develop accurate insights into strategic loaning to avoid risk.
- Understand the terminology surrounding modern loan assessments.
 - Create a cash flow chart for your organisation.
 - Measure and quantify the borrowing needs of others.
- Benchmark your organisation against competitors regarding lending.
- Understand the differences between short-term and long-term loaning.
 - Select the appropriate lending structure for the borrower.
 - Manage a loan throughout its term.
- Accurately and legally document each section of the loan agreement.

Audience

This course is designed for anyone responsible for making financial decisions within an organisation. It would be most beneficial for:

- Business Owners
- Chief Financial Officers
- Financial Professionals
- Operations Managers
 - Directors
 - Risk Assessors
 - Accountants
- Account Managers
 - Auditors
 - Treasurers
- Funding Managers
- Bond Credit Analysts
 - Data Analysts
- Management Consultants
- Investment Managers
 - Lenders
- Compliance Officers
 - Bank Managers

Training Methodology

This course uses various adult learning methods to aid full understanding and comprehension. Participants will review the structure of several real-life loans and work together to identify the most appropriate people to lend to and structure their repayment strategy.

They will review some of the most up-to-date tools used in the financial sector and use them to understand how much return their organisation could get from investing in loan practices at short-term, medium-term, and long-term levels.

Summary

Creating a constructive loan isn't easy. It's important to meet the borrower's needs and ensure that they have the means to repay the loan while protecting the lender.

The loan needs to have just the right strategic repayment set up to allow the borrower to pay

it back steadily without falling into financial hardship. However, the lender needs to receive just enough interest to justify paying out the loan and be assured that they will receive a return on their investment.

A loan agreement depends on various factors, including the payment amount and dates, the purpose of the loan, the collateral against the loan, and the consequences of failure to make payment.

Lenders will also need to do their homework regarding risk and mitigation tactics to avoid earnings loss. Loan structuring within a business is a complex area, and financial professionals must understand the inner workings of capital management, loan structuring, and covenants to lend and take advantage of sensible investment opportunities strategically.

Course Content & Outline

Section 1: Credit & Lending Risks

- What is credit risk, and how to identify it?
 - The various types of risk.
- Sovereign, counterpart, corporate, retail, and systemic risks.
- The current lending environment and associated risk elements.
