

The Transformation Into Digital Banking

Duration: 5 Days

Language: en

Course Code: IND12-109

Objective

Upon completion of this course, participants will be able to:

- Understand the importance of digitalisation for banking.
- Define the concepts and principles of digital banking and how they influence organisational values.
- Establish an efficient and reliable system to manage the transformation of digitalisation.
 - Incorporate new and trending technologies into banking standards.
 - Evaluate the advantages and disadvantages of utilising digital banking.
 - Assess the variety of products available for digital banking.
- Continuously develop digital systems to stay on top of customer demands.
- Analyse current market trends to predict and prepare for future changes.

Audience

This course is designed for anyone responsible for evolving traditional banking services onto a digital platform. It would be most beneficial for:

- Compliance Officers
- Finance Analysts
- Accountants

- Finance Managers
- Digital Marketing Personnel
- Risk Analysts
- Chief Financial Officers (CFOs)
- Business Owners

Training Methodology

This course uses a variety of adult learning styles to aid full understanding and comprehension. Participants will review case studies of organisations that have transitioned to digital banking to highlight key features and challenges faced. They will be provided with all the necessary tools to conduct a variety of learning exercises.

Participants will participate in a combination of video materials, presentations, group discussions, and practical activities. These methods will offer ample opportunities for the participants to fully and comprehensively understand the taught content and all related skills.

Summary

Over recent years, there has been an extreme shift in all industries and sectors into the digital world. Many organisations provide a balance of in-person and digital services, and some offer services exclusively online. This change has made it incredibly important for banking organisations to transition to digital platforms to ensure they can continue to meet customer demands.

Technology is constantly evolving, allowing for banking organisations to utilise a variety of methods to digitalise their products and services. Alongside the benefits of digitalisation, there are many challenges to be faced. Those involved in the transformation into digital banking must be competent in the related technologies, understand the necessity of balancing organisational goals with industry standards and maintain effective risk management.

As banking transitions to a digital platform, it will be accompanied by various risks. These need to be accurately assessed and documented, and preventive measures and solutions need to be established. The risks of digital banking have the capacity to be much more detrimental than traditional banking, so ensuring the safety of customer finances is absolutely crucial.

Course Content & Outline

Section 1: Introduction to Digital Banking

- Understanding traditional banking standards.
- The role of digital banking in modern society.
- The advantages and disadvantages of digitalisation.
- Assessing various types of digital currencies and how they function alongside traditional currencies.
