Cognitive Behavioral Therapy (CBT) Techniques

Duration: 5 Days

Language: en

Course Code: IND5 - 177

Objective

:By the end of this workshop, participants will be able to

- Understand the core principles of CBT.
- Identify common negative thought patterns.
- Apply practical CBT techniques with clients.
- Support emotional regulation and behavior change.
- Use CBT tools such as thought records, behavior charts, and coping strategies.

Audience

:This workshop is designed for

- Psychologists and counselors.
- Social workers.
- School counselors.
- Nurses and mental health professionals.
- Support workers and caregivers.

Training Methodology

Participants will learn through hands-on exercises, live demonstrations, simplified CBT worksheets, case-based discussions, and peer role-plays to practice real techniques in supportive scenarios.

Summary

Cognitive Behavioral Therapy (CBT) is a powerful and evidence-based approach used to help individuals identify and change negative thinking patterns and behaviors. This workshop offers practical CBT tools that mental health professionals and caregivers can use to support clients struggling with anxiety, depression, stress, and other emotional challenges.

Through engaging activities, real-world examples, and simplified tools, participants will learn how to guide individuals toward healthier thinking and behavior using core CBT techniques. The focus is on applying these strategies in therapy sessions, educational settings, or supportive environments.
