

Preparation for the International Certificate in Risk Management

Duration: 5 Days

Language: en

Course Code: MG2 - 195

Objective

:By the end of this course, participants will be able to

- .Understand the core concepts and objectives of enterprise risk management •
- .Apply internationally recognised frameworks including ISO 31000 •
- .Identify and assess risks using structured methodologies and tools •
- .Prioritise risks and implement appropriate treatment strategies •
- .Communicate risk insights effectively and support decision-making •
- .Practically apply knowledge through simulations and case studies •

Audience

:This course is ideal for

- .Risk officers, internal auditors, compliance professionals •
- .Project managers and strategic planners •
- .Finance and operations managers •
- .Professionals preparing for the International Certificate in Risk Management •
- .Anyone involved in risk identification, analysis, or reporting •

Training Methodology

The course uses a blend of theory and practice to ensure a rich learning experience. Interactive lectures provide the foundational knowledge of risk management principles, while real-life case studies encourage critical thinking and application. Group discussions and scenario-based workshops promote peer learning and foster collaborative problem-solving. Participants will work with practical tools such as risk registers and scoring matrices, ensuring they can transfer their knowledge directly to their organisations. The course is facilitated by certified professionals with deep experience in risk management, offering insights into international best practices and certification requirements.

Summary

This intensive training program is designed to prepare participants for the International Certificate in Risk Management by providing them with a comprehensive understanding of risk management frameworks, tools, and techniques. It equips learners with the ability to identify, evaluate, and manage various types of risks in accordance with global standards such as ISO 31000. Whether working in the public or private sector, participants will gain both theoretical knowledge and practical skills essential for applying risk management principles effectively in real-world settings.
