

# Practical IT Service Management with ITIL

## 4

**Duration:** 5 Days

**Language:** en

**Course Code:** PI1 - 140

### Objective

:By the end of this course, participants will be able to

- .Understand the ITIL 4 framework, principles, and its application in ITSM
- .Apply key ITIL 4 service management practices to real-world IT operations
- .Design service value chains that enhance business outcomes
- .Manage incidents, changes, problems, and service requests effectively
- .Use continual improvement models to drive operational excellence
- .Understand the role of automation, AI, and digital transformation within ITIL 4

### Audience

:This course is ideal for

- .IT service managers and team leaders
- .ITIL practitioners preparing for certification
- .Helpdesk and service desk professionals
- .IT operations and support staff
- .IT consultants and process improvement leaders
- .IT governance, compliance, and risk professionals

## Training Methodology

The course blends expert-led instruction with interactive workshops, practical exercises, real-world case studies, group activities, and service simulation labs. Emphasis is placed on applying ITIL 4 principles to everyday ITSM challenges, ensuring practical readiness for immediate application.

## Summary

In a highly dynamic digital business environment, IT Service Management (ITSM) plays a crucial role in ensuring consistent, reliable, and value-driven technology services. ITIL 4, the latest evolution of the globally recognised ITSM framework, offers modern practices that align IT services with rapidly changing business needs through flexibility, collaboration, and value co-creation.

This course offers a practical and hands-on approach to applying ITIL 4 concepts. Participants will learn how to design, operate, and improve IT services while navigating real-world challenges such as rapid change, cloud adoption, automation, and customer expectations. The course focuses on applying ITIL 4 principles in daily service management operations, using real-life scenarios and actionable frameworks.

## Course Content & Outline
